

CLAUDIA POPESCU

FRONTEND DEVELOPER

+41 76 840 62 66 · saftaclaudia27@yahoo.com · Windisch, Switzerland

github.com/saftaclaudia · saftaclaudia.github.io/my-portfolio

PROFESSIONAL SUMMARY

Frontend Developer specializing in React 18/19, TypeScript, and Next.js, with production experience in a fintech environment and a self-built, full-stack e-commerce platform shipped end-to-end. Combines technical precision with strong user empathy — shaped by a background in psychology and institutional legal advisory — translating directly into accessible, human-centered interfaces. Comfortable working across the stack: React front ends, REST APIs, PostgreSQL/MongoDB databases, authentication, and cloud deployment.

PROFESSIONAL EXPERIENCE

Frontend Developer Intern · Informatic M IT Nov 2025 – Jan 2026

VIVE-CREDIT — Full-Lifecycle Fintech Loan Platform · Bucharest, Romania

- Contributed to a production fintech platform covering the entire loan lifecycle — client onboarding, identity checks (KYC), loan application, risk assessment, and portfolio oversight — recognised as one of the top-performing interns by management.
- Delivered React 18 + TypeScript features with Vite, building reusable component architecture and custom hooks (useState, useEffect, useCallback) across loan management dashboards.
- Implemented Redux Toolkit for centralised state management covering authentication flows, client profile data, and real-time notifications, ensuring consistency across protected routes.
- Built a role-based routing system with React Router v7 (administrator, loan officer, client layouts); styled responsive UIs with Tailwind CSS, Shadcn/UI, and Headless UI.
- Implemented React Hook Form + Zod schema validation on multi-step loan application forms; built Multer-based file upload handling for KYC documents and contract management.
- Collaborated with the backend team on Node.js & Express REST APIs with TypeScript, CORS configuration, and data pipeline integration for risk evaluation dashboards.

Frontend Developer · Personal Projects 2025 – Present

MediTrack — Full-Stack Health Management App github.com/saftaclaudia/meditrack-app

- Architected and built a full-stack health platform for women 40+: React 19, TypeScript, Vite, Redux Toolkit, Zustand, Tailwind CSS (frontend); Node.js, Express, MongoDB, Mongoose (backend).
- Full authentication system: JWT + bcryptjs, Google OAuth, token-based email verification, forgot/reset password, and rate limiting on sensitive endpoints.
- Six feature modules — Medical Exam Tracking, Nutrition, Water, Weight, Activity, and Recipes — with a Smart Notification engine (7 node-cron jobs) and unread-badge dropdown.
- Full i18n (Romanian/English/German), dark/light theme, responsive mobile layout, and a RESTful API covering 9 resource domains with JWT-protected routes and express-validator.

Art Portfolio & Shop — Full-Stack E-Commerce Platform github.com/saftaclaudia/art-portfolio

- Designed and shipped a complete art portfolio and online shop end-to-end: React 19, Vite, Tailwind CSS, React Router v7, Framer Motion, @dnd-kit (frontend); Supabase — PostgreSQL, Auth, Storage — with Row Level Security policies (backend).
- Built a filterable product gallery with image carousels, dynamic product pages with multiple images, print size/price variants, and a persistent shopping cart with a full checkout flow triggering automated email notifications.

- Implemented a password-protected admin panel: full CRUD for products, multi-image upload to cloud storage, drag-and-drop reordering (@dnd-kit), and a self-service password reset/account management flow.
- Optimised for SEO with per-page meta tags (React Helmet Async), Open Graph tags, robots.txt, and sitemap.xml; deployed on Vercel with CI/CD from GitHub and a custom SPA-routing configuration.

Interactive Resume Website saftaclusdia.github.io/interactive-resume

- Single-page app featuring IntersectionObserver-triggered scroll animations, dynamic navbar, and downloadable PDF export — fully responsive with zero external dependencies.

Portfolio Website saftaclusdia.github.io/my-portfolio

- Component-based showcase of projects, tech stack, and live demos, with i18n support — clean, responsive, optimised for desktop and mobile.

TECH STACK

Frontend: HTML5 · CSS3 · Sass · Tailwind CSS · JavaScript · TypeScript · React 18/19 · Next.js · Redux Toolkit · Zustand · React Router · React Hook Form · Zod · Shadcn/UI · Headless UI · Framer Motion · Recharts · i18next · Vite

Backend & Databases: Node.js · Express.js · MongoDB · Mongoose · PostgreSQL · Supabase (Auth, Storage, RLS) · REST APIs · JWT · bcryptjs · Google OAuth · nodemailer · node-cron

Tools & Platforms: Git · GitHub · VS Code · Figma · Vercel · Axios

EDUCATION & TRAINING

Frontend Developer — Accredited Diploma · SkillBrain *May – Oct 2025*

- Accredited program covering React, JavaScript, HTML5, CSS3, component-based architecture, and responsive design. Built multiple real-world projects; tools: Git, GitHub, Vite, Tailwind CSS.

Master's in Organizational & Management Psychology · West University of Timișoara *2005 – 2007*

Bachelor's in Psychology · West University of Timișoara *2001 – 2005*

ADDITIONAL EXPERIENCE

Legal Advisor · Timișoara City Hall — Tax Office *2007 – Sep 2026*

- Handled complex legal appeals against fiscal decisions; provided cross-departmental advisory support and managed the institutional website — demonstrating long-term reliability, analytical rigor, and institutional communication skills.

Psychologist · SC Psi Praxis SRL *Sep 2005 – Aug 2007*

- Conducted psychological evaluations for driver's license certification and occupational health; administered and interpreted standardized testing instruments; prepared official psychological reports.

RECOMMENDATION

"I highly recommend her as one of the top-performing interns." — Dabu Bogdan, Informatic M IT (full letter available upon request)
