

CLAUDIA POPESCU

FRONTEND DEVELOPER

+40 761 947 965 · saftaclaudia27@yahoo.com · Timișoara, Romania
github.com/saftaclaudia · saftaclaudia.github.io/my-portfolio

PROFESSIONAL SUMMARY

Frontend Developer specializing in React 18, TypeScript, and Next.js, with hands-on experience shipping production features in a fintech environment and building full-stack applications from scratch. Brings a rare combination of technical precision and deep user empathy — shaped by a background in psychology and institutional advisory — that translates directly into clean, accessible, human-centered interfaces. Committed to writing maintainable code, delivering polished UIs, and continuously expanding full-stack capabilities.

PROFESSIONAL EXPERIENCE

Frontend Developer Intern • Informatic M IT

Nov 2025 – Jan 2026

VIVE-CREDIT — Full-Lifecycle Fintech Loan Platform

Bucharest, Romania

Contributed to a production fintech platform covering the entire loan lifecycle — from client onboarding and identity checks (KYC) to loan application, risk assessment, and portfolio oversight — recognised as one of the top-performing interns by management.

Delivered React 18 + TypeScript features with Vite, building reusable component architecture and custom hooks (useState, useEffect, useCallback) across loan management dashboards.

Implemented Redux Toolkit for centralised state management covering authentication flows, client profile data, and real-time notifications, ensuring consistency across protected routes.

Built a role-based routing system with React Router v7 (administrator, loan officer, client layouts); styled responsive UIs with Tailwind CSS, Shadcn/UI, and Headless UI.

Integrated React Hook Form + Zod schema validation on multi-step loan application forms; implemented Multer-based file upload handling for KYC documents and contract management.

Collaborated with the backend team on Node.js & Express REST APIs with TypeScript, CORS configuration, and data pipeline integration for risk evaluation dashboards.

Frontend Developer • Personal Projects

2025 – Present

MediTrack — Full-Stack Health Management App

Jan 2026 – Present

github.com/saftaclaudia/meditrack-app

Architected and built a full-stack health management platform for women 40+ using React 19, TypeScript, Vite, Redux Toolkit, Zustand, and Tailwind CSS on the frontend; Node.js, Express, MongoDB, and Mongoose on the backend.

Implemented a complete authentication system with JWT + bcryptjs, Google OAuth (via @react-oauth/google and google-auth-library), token-based email verification, forgot/reset password flows, and rate limiting on sensitive endpoints.

Built a comprehensive Medical Exam Tracking module: add/edit/delete exams with status badges (Completed, Soon, Upcoming, Overdue), document upload (PDFs and images), auto-computed next exam dates, CSV export, and print support.

Developed a full Nutrition Tracking system: daily food logging by meal type (Breakfast, Lunch, Dinner, Snacks), macro tracking (carbs, protein, fat), a visual calorie ring, calorie history, meal templates, and a

favourites system with a built-in food database.

Added Water, Weight, and Activity Tracking modules with daily logs, history views, a 7-entry weight sparkline on the dashboard, and a built-in activity database with calorie estimates.

Implemented a Smart Notification system using node-cron scheduled jobs: exam reminders, overdue exam alerts, calorie and water pacing reminders, and configurable meal-time notifications — delivered via a navbar dropdown with unread badge.

Built full internationalisation (i18next) supporting Romanian, English, and German, with dark/light theme toggle, responsive mobile layout with bottom navigation bar, and toast notifications.

Designed and implemented a RESTful API covering 9 resource domains (auth, exams, calories, profile, recipes, activities, water, weight, meal templates) with JWT-protected routes, input validation (express-validator), and CORS configuration.

Interactive Resume Website

saftaclusdia.github.io/interactive-resume

Single-page app featuring IntersectionObserver-triggered skill bar animations, staggered scroll reveals, dynamic navbar, and downloadable PDF export — fully responsive with zero external dependencies.

Portfolio Website

saftaclusdia.github.io/my-portfolio

Modern portfolio built with component-based architecture showcasing projects, tech stack, and live demos — clean, responsive, optimized for both mobile and desktop.

TECH STACK

Frontend: HTML5 · CSS3 · Sass · Tailwind CSS · JavaScript · TypeScript · React 18/19 · Redux Toolkit ·

Zustand · Next.js · React Router · React Hook Form · Zod · Shadcn/UI · Headless UI · Recharts · i18next · Vite

Backend & DB: Node.js · Express.js · MongoDB · Mongoose · PostgreSQL · Supabase · REST APIs · JWT · bcryptjs · nodemailer · node-cron · Google OAuth

Tools: Git · GitHub · VS Code · Figma · Vite · Axios

EDUCATION & TRAINING

Frontend Developer — Accredited Diploma · SkillBrain

May – Oct 2025

Completed accredited program covering React, JavaScript, HTML5, CSS3, component-based architecture, and responsive design. Built multiple real-world projects; tools: Git, GitHub, Vite, Tailwind CSS.

Master's in Organizational & Management Psychology · West University of Timișoara

2005 – 2007

Bachelor's in Psychology · West University of Timișoara

2001 – 2005

ADDITIONAL EXPERIENCE

Psychologist · SC Psi Praxis SRL

Sep 2005 – Aug 2007

Timișoara, Romania

Conducted psychological evaluations for driver's license certification and safety compliance.

Performed pre-employment and periodic psychological assessments for occupational health (medicine of work).

Selected, administered, and interpreted standardized psychological testing instruments.

Prepared psychological reports and official certifications based on assessment results.

Psychological Assessment · Reporting · Occupational Health

Legal Advisor • Timișoara City Hall — Tax Office

2007 – Present

Handled complex legal appeals against fiscal decisions; provided cross-departmental advisory support and managed the institutional website — demonstrating long-term reliability, analytical rigor, and institutional communication skills.

LETTER OF RECOMMENDATION

"I highly recommend her as one of the top-performing interns."
